

Unique party concept in the Gamsstadt

Silent Disco 750 in Kitzbühel's BH-Hof.

07.09.2022 / On Saturday, September 10th, 2022, the event concept of the Silent Disco in the arcade courtyard of the district headquarters attracts visitors to dance exuberantly in the Kitzbühel city center.

Disco with a difference

A silent disco - a unique club concept. The principle is as simple as it is ingenious. All participants receive wireless headphones while two DJs play simultaneously on two different channels, between which each can choose. So you can listen to whatever you feel like and you can happily sing along, because no one is listening. Whether to house, electro, hip-hop and charts or to indie, rock and classics - cool beats invite you to unpack your dance moves.

The musically festive event with free admission starts on Saturday, September 10th, 2022 at 7.00 pm. For four hours until 11.00 pm in the Kitzbühel city center can properly swing the dance legs and rock out to the music of your choice.

A unique picture, when you are surrounded by hundreds of singing and dancing people, although no music can be heard. If you ever feel like a quick rest, just turn off your headphones, switch right off and have a drink while enjoying some nice small talk.
