

# 291 | Lisi Osl Trail

<b>distance</b>	2,0 km	<b>difficulty</b>	average
<b>altitude meters downhill</b>	410 m		
<b>starting point:</b>	Gaisberglift Bergstation		
<b>destination point:</b>	Gaisberglift Talstation		
<b>best season:</b>	MAY, JUN, JUL, AUG, SEP, OCT		

Altitude profile

## Description

On a length of about 2 km, it is necessary to overcome a height difference of 403 meters. The route intuitively follows the natural terrain. With its difficulty level of S1 to S2 (easy to medium), the new trail is not only a highlight for real downhill cracks, it is also manageable for singletrack beginners. Comfortable: You start directly at the exit of the Gaisberg lift. Using a special device, the bikes and bikers are taken up the mountain.
