

# DDr. Michael Sereinig

<p>Specialist for &nbsp;dentofacial surgery. By appointment only.</p>

## Description

Oral and maxillofacial surgery (OMF surgery) is the medical specialty that deals with the surgical therapy of diseases of the bones and soft tissues of the head.

In order to achieve an optimal treatment result for the patient, if necessary, the therapy is coordinated with specialists who are also active in the fields of dentistry, orthodontics, ophthalmology, ear, nose and throat medicine, which are responsible for the head area.

The office is an elective practice. You can contact us without a referral, in most cases you will be referred by the treating dentist or orthodontist.
