Description

In the fall of 2009 I opened my practice for you in the Kitzbühel Health Center. Professional competence paired with humanity and time for the patient are for me basic requirements for good medical care. My broad training as a specialist in internal medicine and a specialist in pulmonary medicine offers you many advantages, especially when the two specialties overlap, such as in cases of shortness of breath or chest pain.

Through my many years of professional experience, most recently 6 years as a senior physician in a hospital, I can offer you the professional and human competence.
