

Reitherwirt

In this family, hunting is passed on from generation to generation. The hunting is for the righteousness of the game, trying to maintain harmony between forest and game, and "honoring the creator in the creature."

Description

You will find not only meat but also fish specialities on the menu. There are 6 natural fish ponds, which were built in terraces. Trout from our own breeding swim in them and are supplied with our own spring water. Of course, there are also vegetarian dishes, home cooking, light cuisine and speciality weeks depending on the season.

Take a seat in the garden, in the parlours or in the cosy restaurant and enjoy specialities of game from our own hunt, fresh trout from the house pond, beef and veal from our own farm all year round. Free wifi available, Mastercard accepted.
