Description

The Swarovski Crystal Worlds are **only 20 kilometres east of Innsbruck** and can also be reached directly by [shuttle](#). The famous giant and the extensive garden can already be seen from the entrance. The play tower offers lots of fun for children and families on four levels. Many more adventures await at the **playground**, in the labyrinth and at the children's workshops. The carousel also turns its rounds tirelessly. Inside the giant, the exhibition continues. Here you will find the **18 Chambers of Wonder**. Among the highlights are Silent Light, an icy chamber with snow all year round, and The Art of Performance chamber, where everything revolves around the history of Swarovski in Hollywood. Unique in the German-speaking world is the physical-meditative light experience created by the artist James Turrell. Near the exit is the generously designed **Swarovski Store** with countless souvenirs and pieces of jewellery. The café and restaurant "**Daniels Kristallwelten**" with its own patisserie offers the perfect end.
