## Beschreibung

This extended tour offers various refreshment stops, as well as the connection to route MTB 260 "Streuböden". From the information office in Fieberbrunn, the route starts along the Ache in the direction of Gasthof Eiserne Hand / Lärchfilzhochalm. After approx. 3 km turn right, follow the steadily uphill road and pass the Niederfilzboden farm. The route then runs alternately through the forest and mountain farmland. Shortly after the chapel, the forest road begins, which first leads through the forest and later through the alpine pasture area "Lärchfilzen". From here on, grazing cattle are to be expected - please exercise increased caution! At the Lärchfilzhochalm, it is possible for less experienced cyclists to choose the variant via the "Jägersteig" to the Wildalpgatterl mountain inn. To do this, turn right and follow the path that climbs gently at first through the alpine pasture area and then descends through the beech forest to the mountain inn. More experienced bikers can choose the gravel path that climbs to the right past the Grießenbodenalmen to the Wildalmen. At the cable car hut and the Frandlalm, continue straight on to the Koglhöhe. This is where the share trail to the mountain inn starts - please be considerate and look ahead! Pass the Wildalpgatterl mountain inn on the left and turn left again after approx. 300 m. The first bends towards the Zillstattalm are somewhat steeper! The downhill forest road winds through green meadows to the asphalt road. The route leads past the Lauchsee lake and straight on back to the starting point.
